

Sean Chow

WORK EXPERIENCE

Two Sigma

Product Manager

Jan 2023 – Jan 2025

New York, NY

- Responsible for product suite maintained across 25+ engineers for the Compute, Service Infrastructure and Process Orchestration Workflow teams
- Managed product road map and engineering engagements for the Kubernetes platform hosting over 4,000 services and 1,000,000+ of batch jobs a week, supporting data ingestion, low latency live trading, and modeling teams focusing on developer experience, efficiency and reliability
- Collaborated with engineering on technical specifications to enable efficient, scalable and reliable compute to support modelling engineering teams and simulations
- Secured alignment from 10+ business units across engineering, product, and modeling teams on yearly platform strategy, resulting in a unified road map

Kong

Senior Product Manager

Oct 2021 – December 2022

New York, NY

- Executed comprehensive stakeholder engagement for the Kubernetes product roadmap, open source involvement and shipping of features through agile development for the Kubernetes team; gathering insights from 100+ enterprise users
- Created multiple new products from identified problems, ultimately bringing new products from idea to creation and ultimately go-to-market which included sales/technical enablement, developer advocacy and blog posts
- Collaborated with engineering on technical specifications for marquee features such as the Kong Gateway Operator, Gateway API support and Kubernetes support for Kong's SaaS product

Datadog

Product Manager

May 2020 – September 2021

New York, NY

- Led strategic planning for the Marketplace team, owning the product strategy, road map and shipping of features, through creation of product specifications and agile development
- Grew the partner integration ecosystem by overseeing the on-boarding and development of 80+ technology partner contributions from product ideation phase to release, including go-to-market activities
- Brought the Datadog Marketplace from ideation to go-to-market, launching an ecosystem of partner created integrations and products that grew from \$0 to > \$1.5m ARR

Datadog

Product Manager Intern

May 2019 - Aug 2019

New York, NY

- Led strategic planning for the containers integration team, focusing on the instrumentation and visibility of the Datadog agent on platforms such as Kubernetes, GKE and EKS, growing adoption of the integrations by 21%
- Wrote a product specification and coordinated engineering and design work to improve the live containers page, releasing with a go to market strategy including blog posts, dashboards, a PRFAQ and marketing material

Wave

Software Engineer Intern

Jan 2019 - May 2019

Toronto, ON

- Part of the developer systems team, creating tools and solving problems to increase developer efficiency and reliability
- Developed a command line tool in Typescript to monitor local developer systems and reduced local Docker development build time by 120%

SKILLS

Product Skills:

A/B Testing, Agile Development, Product Roadmapping, Customer Interviews, Partnership Management, Infrastructure Planning, User Research, Systems Architecture

Technologies:

Kubernetes, GKE, ECS, EKS, Envoy, L4-L7 Networking, Gateway API

Product Tools:

Looker, Metabase, Salesforce, Zendesk, Figma, JIRA, Excel, BigQuery

Programming Languages:

Python, Javascript, Typescript, Java, C, Go, SQL

EDUCATION

University of Guelph

Software Engineering Co-op
Grad. May 2020

TEACHING

Teaching Assistant

Software Design - CIS*1250
Conducting labs teaching the basics of software development and marking.
